

AQUA FEEDER® Pig Feeders

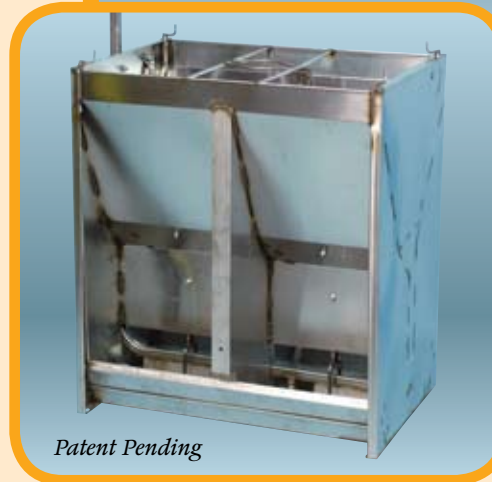

The CHORE-TIME® AQUAFEEDER® Pig Feeding System is an industry-leading wet/dry feeder with a reputation for efficiency and durability that has been gained through years of performance. The Adjustable Feed Saver Lip feature of these wet/dry feeders helps pig producers to shrink waste of feed and water for less manure handling. These wet/dry feeders are designed for use in wean-market facilities to feed pigs ranging in size from 12 to 280 lbs. (5 to 125 kg).

Product Features and Advantages

- Adjustable Feed Saver Lip on feed trough helps prevent feed waste while providing easier access for small pigs.
- Pigs get fresh feed several times each day.
- Ideal for center-pen or fence-line feeding configurations.
- Pigs gain access to feed by pushing paddles, and they moisten the feed by pushing the nipple drinkers to mix feed and water to their liking.
- Allows pigs to move easily from feed to water at the same station without side restrictions or barriers.
- Solid divider panels in feed trough reduce waste and mortality while increasing durability.
- 14-inch (356-mm) head spacing is standard for all wean-market feeders.
- Top quality welded Type 304 stainless steel construction of feeder, trough and drinking system.
- Designed to prevent feed bridging in feeders.
- Feed reservoir cannot be contaminated from feed trough.
- Convenient and precise feed level adjustment.
- Easy installation & cleaning.
