

Feed Bin Scale System for Pigs

Chore-Time's Digital WEIGH-MATIC® Feed Bin Scale System:

- Provides accurate weights for feed delivered to individual feed bins.
- Keeps accurate inventory of feed in storage at all times.
- Is simple to operate and to adapt to feeding systems for either livestock or poultry.
- Requires no secondary feed weigh bin, no additional feed delivery systems, and no special housing.

Digital WEIGH-MATIC® Feed Bin System's Load Cells are temperature-compensated to help assure the accuracy of the feed inventory weights. Systems are available with gross capacities up to 220,000 pounds (99,800 kg).

Steel I-beam adapters allow the use of four load cells with a six-leg feed bin. Maximum feed bin size for this option is a 21.4-ton (19.4 metric tons), 9-foot (2.7-meter) diameter bin.

Choose one of Chore-Time's advanced Scale Indicators. All models feature:

- Large, easy-to-read LCD display.
- Microprocessor retains inventory information even if electrical power is interrupted.
- Connection for a computer or printer.
- Weather- and dust-resistant housing/case.

Model 200 Indicator

Precise feed management made simple, economical
